

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. 1891.

H2261

STATE OF NEW JERSEY,
OFFICE OF COMPTROLLER OF THE TREASURY, }
TRENTON, May 20th, 1891.

To the Senate and General Assembly:

In compliance with the provisions of an act entitled "An act respecting annual reports to the Legislature of railroad and canal companies," approved February 24th, 1852, and a supplement thereto approved April 3d, 1873, I have the honor to lay before you the report and statements of the State Director of the United New Jersey Railroad and Canal Company for the year 1890, and the reports of all railroads and canal companies for said year.

For convenient reference, as heretofore, a tabular statement has been prepared and appended to the reports, giving in condensed form the information found in the individual statements.

Very respectfully,

WM. C. HEPPEHEIMER,
Comptroller.

STATE DIRECTOR'S REPORT.

To the Governor of the State of New Jersey :

SIR—In accordance with the provisions of the law, I have the honor to transmit herewith my annual report as State Director of the United New Jersey Railroad and Canal Company for the year 1890.

As in previous years, this report will be found to contain an account of the number of miles in operation, together with the receipts and disbursements of the different divisions and branches leased by the Pennsylvania railroad.

For an account of the moneys received by the State, I respectfully refer you to the report of the State Treasurer, where the same will be found properly itemized.

This company is in a splendid condition, in every respect. The vigilance displayed by its officers and the Board of Directors, in my judgment, is a good and substantial proof that the interests of the State are well guarded. It gives me pleasure to say that the management has my full indorsement.

Respectfully,

E. F. C. YOUNG,

State Director.
